September 2016

CARE Consortium Investigator Meeting

The next NCAA - DOD Grand Alliance CARE Consortium Investigator Meeting will be held November 9-10, 2016, at the Crystal Gateway Marriott, in Arlington, VA. All meeting events will be held at the hotel.

In general, attendees should plan their arrival for the morning of Wednesday, November 9th, as the general meeting session is scheduled to begin around 1:30PM ET, followed by a group dinner later that evening, and departure on Thursday, November 10th after 12:30PM ET.

We look forward to a great meeting in Virginia.

Spotlight on CARE Performance Sites

pARC

As part of the CARE Option, CARE is excited to announce the inclusion of two military service academies into the ARC Study: West Point and Air Force. West Point and Air Force will be conducting a partial-ARC, or "pARC," at their sites that include all aspects of the ARC protocol (though not including imaging at this time). The inclusion of the military service academies will boost the number of expected injuries, giving us a more extensive injury pool to analyze. In addition to the ARC sports of basketball, football, ice hockey, and soccer, the new ARC sites will also include rugby, wrestling, boxing, and combat training injuries. We look forward to the contributions that these two new performance sites will bring!

Data Management

Thank you to all the Site Primary Investigators and Project Managers who provided feedback at the June 2016 CARE Consortium Investigator Meeting on the CARE Data Capture Application and Participant Portal. The CARE Data Management Team, in conjunction with QuesGen Systems, Inc., will be working through the end of the year to provide additional features to the CARE Data Capture Application and Participant Portal. A major feature will be one that allows for sites to more effectively manage data quality within the database. These features will be implemented over the course of the next few weeks, and a presentation outlining them will be presented to the Consortium members at the upcoming CARE Consortium Investigator Meeting in November 2016.

CARE Connect

If you would like to collaborate with the CARE Consortium, please complete a Research Collaboration form. Collaboration Requests are reviewed monthly by the CARE Consortium Operating Committee.

CARE Data Request

Effective immediately, the CARE Principal Investigators have determined that a moratorium on new data set requests must be established; therefore, the CARE Publication Committee will not review any new data requests or request for publications until they reconvene their monthly meetings starting January 2017.

For any questions, please contact the CARE AOC at careaoc@iupui.edu.

Thank You.
